

Cloud Data & Artificial Intelligence Engineer

After 12 years working for Microsoft as Data Engineer, I decided to pursue a new adventure, founding OJO Consulting. I have more than 15 years of experience in data processing, architecture designing, and implementation of BI and Big Data solutions mainly based on Microsoft technologies. I have contributed to the success of numerous major projects with clients in different sectors, enabling them to efficiently exploit and maximize the potential of their data. I am passionate about innovation and solving complex problems. My mission is to support organizations in their digital transformation to help them optimize their performance and productivity.
